

## ***Java programs in this book***

The Java programs that are presented and explained in this book are listed below in alphabetical order according to their file names. If you know the file name of a program, the list below helps you to find the page on which the program is explained. The physical files of the source programs that are discussed in the chapters of this book can be found in the directories (folders) **javafiles1**, **javafiles2**, and **javafiles3** among the electronic material associated with this book. The numbers in the directory names refer to the three parts of this book. For example, the programs that are discussed in Part II of this book are stored in directory **javafiles2**. In addition to the programs that are listed below, the electronic material provides programs in the **javafilesextra** directory. Those programs are not widely discussed in this book. Then there is the directory **javasolutions** which contains solutions to programming exercises.

Additions.java - 1. Demonstrating the use of the + operator. . . . .	124
Animals.java - 1: Class Animal with two constructors and two other methods. . . . .	308
ArrayDemo.java - 1.+ A program that demonstrates the use of an array. . . . .	180
ArrayListDemo.java - 1: Demonstrating the standard class ArrayList. . . . .	506
BankBetter.java - 1: A program with a BankAccount class that has a constructor. . . . .	302
BankPolymorphic.java - 1: A program with several bank account classes. . . . .	416
BankSimple.java - 1: The declaration of class BankAccount. . . . .	296
BetterDate.java - 1: Deriving a new class from an existing class. . . . .	386
Binary.java - 1: A method that prints an integer value in binary form. . . . .	536
Birthdays.java - 1. A program that finds the dates for the most important birthday parties. . . . .	346
BirthdaysGregorianCalendar.java - 1. A rewritten version of program Birthdays.java. . . . .	522
Boxings.java - 1: Boxing and unboxing activities demonstrated. . . . .	437
Calculate.java - 1: First part of the program. . . . .	280
Calendars.java - 1: A program with which calendars can be printed. . . . .	394
Capitals.java - 1.+ A simple program to find the capitals of some countries. . . . .	218
Celsius.java - 1. Converting temperature values with an initialized array. . . . .	193
Clock.java - 1: A program which acts as a kind of clock. . . . .	546
Collect.java - 1: The first part of a program to maintain data about a collection. . . . .	482
Columbus.java - 1. Demonstrating the use of Date objects. . . . .	345
Commanding.java - 1. A method main() that prints the given command line parameters. . . . .	279
Convert.java - 1 - 1. Method convert() of class Conversion. . . . .	320
Convert.java - 1+.: A program to make conversions between units of measure. . . . .	318
CurrentDate.java - 1. The declaration of class CurrentDate. . . . .	390
Date.java - 1: A general-purpose class to handle date information. . . . .	350
DateDistance.java - 1. A class that represents a chronological distance between two dates. . . . .	361
Decorations.java - 1.+ Method main() calls a method that takes a string as a parameter. . . . .	248
Distance.java - 1.+ A program to convert meters to other units of distance. . . . .	114
DotsAndDollars.java - 1: A program that runs as three threads. . . . .	541
Elvis.java - 1. Modifying some characters of a StringBuilder object. . . . .	227
Evenodd.java - 1. A program to find out whether a given integer is even or odd. . . . .	139
Events.java - 1: The declaration of class Event. . . . .	516
ExceptionalNumbers.java - 1: Throwing and catching some exceptions. . . . .	440
Filecopy.java - 1: A program that makes a copy of a text file. . . . .	460
Fileprint.java - 1.+ A program that reads a text file and prints the text lines to the screen. . . . .	458
FileToNumbers.java - 1: A program to show the contents of a file as hexadecimal bytes. . . . .	474
Findreplace.java - 1: A program to replace a string with another string in a text file. . . . .	464
First.java - 1. A Java program that prints a single line of text to the screen. . . . .	13
For20.java - 1. Program While20.java implemented with a for loop. . . . .	159
Forcodes.java - 1.+ A program that prints a character code table. . . . .	162
Formatting.java - 1. Demonstrating the use of format specifiers. . . . .	126
Friday13.java - 1. A program that demonstrates how certain kinds of dates can be searched. . . . .	348
Friday13GregorianCalendar.java - 1. A rewritten version of program Friday13.java. . . . .	524

Fullname.java - 1. The input/output of strings. . . . .	201
Game.java - 1.+ A program that implements a simple computer game. . . . .	102
Highmiddlelow.java - 1: Declarations of classes MemberClass, HighClass, and MiddleClass. . . . .	402
Iffing.java - 1. A program that contains a complex if construct. . . . .	144
Interest.java - 1.+ Calculating interest on interest with a multidimensional array. . . . .	194
Largeint.java - 1.+ A program to find the largest of three integers. . . . .	136
LargestWithIntParameter.java - 1: A rewritten version of LargestWithReturn.java. . . . .	380
LargestWithReturn.java - 1. A method that returns data to its caller with a return statement. . . . .	256
Letters.java - 1. Method main() calling a method that calls two other methods. . . . .	243
Likejava.java - 1.+ A program containing an if-else if-else construct. . . . .	142
Likejavas.java - 1. Program Likejava.java rewritten using a switch-case construct. . . . .	148
Marilyn.java - 1. The use of string method compareTo(). . . . .	212
MathDemo.java - 1. Using some mathematical methods of the standard class Math. . . . .	447
Meanvalue.java - 1. A program to calculate the mean value of a set of integers. . . . .	165
MeanvalueArray.java - 1.+ An improved version of program MeanvalueException.java. . . . .	186
MeanvalueException.java - 1. A rewritten version of Meanvalue.java. . . . .	172
MeanvalueMethod.java - 1: The first part of the program. . . . .	260
Messages.java - 1. Method main() calling a simple method named print_message(). . . . .	241
Miles.java - 1. A program that uses floating-point variables. . . . .	111
Months.java - 1.+ Demonstration of an initialized array of strings. . . . .	232
MorseCodes.java - 1. Using class ArrayList to store String objects. . . . .	509
NumbersToFile.java - 1. A program that stores numerical values to a binary file. . . . .	476
Olympics.java - 1: The declaration of class Olympics. . . . .	313
Overload.java - 1. A program containing several versions of the method print_array(). . . . .	284
Person.java - 1. A class that has public data fields. . . . .	298
Planets.java - 1: A program that gives information about planets. . . . .	321
Playtime.java - 1: A program that displays time information after every 5 seconds. . . . .	544
Presidents.java - 1: A program that provides information about U.S. presidents. . . . .	368
Rectangles.java - 1: The declaration of class Rectangle. . . . .	292
Reverse.java - 1.+ A program that inputs integers and prints them in reverse order. . . . .	184
ScopeExploration.java - 1. Using classwide and local data. . . . .	277
Search.java - 1: A method that searches for a string in a text file. . . . .	462
Sentence.java - 1. Using a switch-case construct with no break statements. . . . .	150
Showtime.java - 1. Extracting time/date information from a GregorianCalendar object. . . . .	526
Sleepings.java - 1. Demonstrating the use of the Tread.sleep() method. . . . .	540
Sort.java - 1: A program whose methods are in three classes. . . . .	264
SplittingAtoms.java - 1.+ Splitting a string with method split(). . . . .	234
Stack.java - 1: The fields and constructors of class Stack. . . . .	328
States.java - 1: Using method substring() and the concatenation operator +. . . . .	214
StatesStringBuilder.java - 1: A rewritten version of program States.java. . . . .	228
StringEquality.java - 1: Demonstrating the equality operator and method equals(). . . . .	210
Stringing.java - 1: Demonstrating string construction and character access. . . . .	216
StringMethodsMore.java - 1. contains(), indexOf(), regionMatches(), and substring() in use. . . . .	213
StringReverse.java - 1. Printing the characters of a string in reverse order. . . . .	207
Sum.java - 1.+ A program to calculate the sum of two integers. . . . .	15
SumImproved.java - 1. A slightly improved version of program Sum.java. . . . .	18
Sums.java - 1.+ Method main() calls a method that takes two parameters of type int. . . . .	246
Times.java - 1: Demonstrating the use of an abstract class named CurrentTime. . . . .	424
Titanic.java - 1. A program that uses both a Date object and a CurrentDate object. . . . .	391
Translate.java - 1: The declaration of class BilingualTranslation. . . . .	510
TruthValues.java - 1. A program that prints truth values. . . . .	175
Uplow.java - 1. A program that demonstrates the use of the bitwise-AND operator &. . . . .	535
Weddingdates.java - 1.+ Using a CurrentDate object to find the next best wedding dates. . . . .	392
While20.java - 1. A program containing a simple while loop. . . . .	155

Whilesum.java - 1. A program to calculate the sum of integers in a while loop.....	156
Widename.java - 1. Referring to individual characters of a string. ....	205
Windows.java - 1: A program with a long class hierarchy. ....	406
Words.java - 1.+ A program that contains many blocks of statements. ....	168

## ***Pages where exercises can be found***

Programming exercises are presented in special exercise boxes in this book. An exercise box is not always located at the end of a chapter. A chapter may have several exercise boxes among the body text. The list below helps you to find those pages that contain an exercise box.

Exercises with program Sum.java	17
Exercises related to numbering systems	39
Exercise related to main memory usage	52
Exercises related to machine-level programming	72
Exercise with the IC8 simulator program	81
Exercises with programs abcde.iml and aaaabbbbcccc.iml	86
Exercises with programs reverse_in_memory.iml and reverse_in_stack.iml	89
Exercises with program Game.java	105
Exercises with program Distance.java	116
Exercises – write some simple programs	123
Exercises related to if constructs	146
Exercises related to boolean expressions	149
Exercises related to while loops	161
Exercises with loops	166
Exercises with program ArrayDemo.java	179
Exercises related to arrays	192
More exercises related to arrays	197
Exercises related to strings	206
Exercises with Marilyn.java	230
Exercises related to strings and arrays	237
Exercises related to methods	252
More exercises related to methods	253
Still more exercises related to methods.	263
Exercises related command line parameters	285
Exercises with program BankBetter.java	304
Exercises with program Animals.java	307
Exercises related arrays containing object references	312
Exercise with program Stack.java	330
Exercises related to classes	338
A first exercise with Date objects	344
Second exercise with Date objects	349
More exercises with class Date	364
Exercises to improve class Date	364
Exercises with program Presidents.java	378
Exercises related to inheritance	399
Exercises with program Windows.java	412
Exercise with program BankPolymorphic.java	421
Exercise with program Times.java	428
Exercises with program ExceptionalNumbers.java	444
Exercises related to text files	468
Exercises related to binary files	477
Exercises with program Collect.java	481
Exercises with program Translate.java	513
Exercises related to ArrayList-based arrays	513
Exercise related to program Events.java	519
Exercise related to sorting of arrays	519
Exercises with class GregorianCalendar	528
Exercises related to bit operators	549

Exercises related to timing .....	549
Exercises related to timing (continued) .....	550
Exercises related to timing (continued) .....	551
